Navigating to the HEAL UI

HEAL Software Inc.

Sign in to the HEAL UI to land on the **Application Health Dashboard (CXO Dashboard)**. From here you can reach every other part of the product. This page maps the main navigation.

Main navigation

1. Services tab. Lists every component instance running on your hosts. Open the Services tab guide.

2. Signals tab. Shows Problems and Early Warnings so you can act before users feel the impact. Open the Signals tab guide.

3. ML Insights tab. Data-driven predictions and recommendations based on your performance trends. Open the ML Insights guide.

4. Reports tab. Reports across applications, infrastructure, and services. Open the Reports tab guide.

5. Account selection dropdown. Switches between accounts. Each account groups its own applications, services, and instances.

6. My Profile. Edit your profile, jump to external links, or log out.

Next

- Setting Date and Time . change the time range used by every screen.

HEAL Confidential. All Rights Reserved 2026

- Time Zones . set your preferred time zone.
- Logging out . end your session safely.
