Setting Date and Time in HEAL UI

HEAL Software Inc.

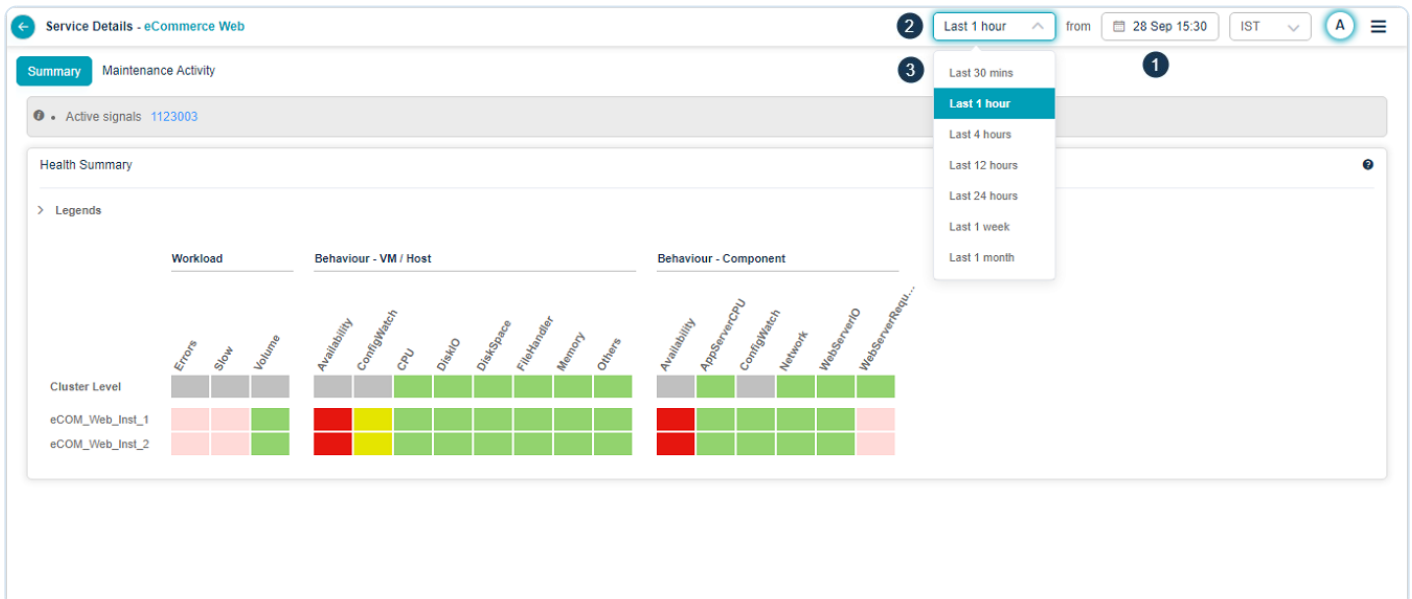

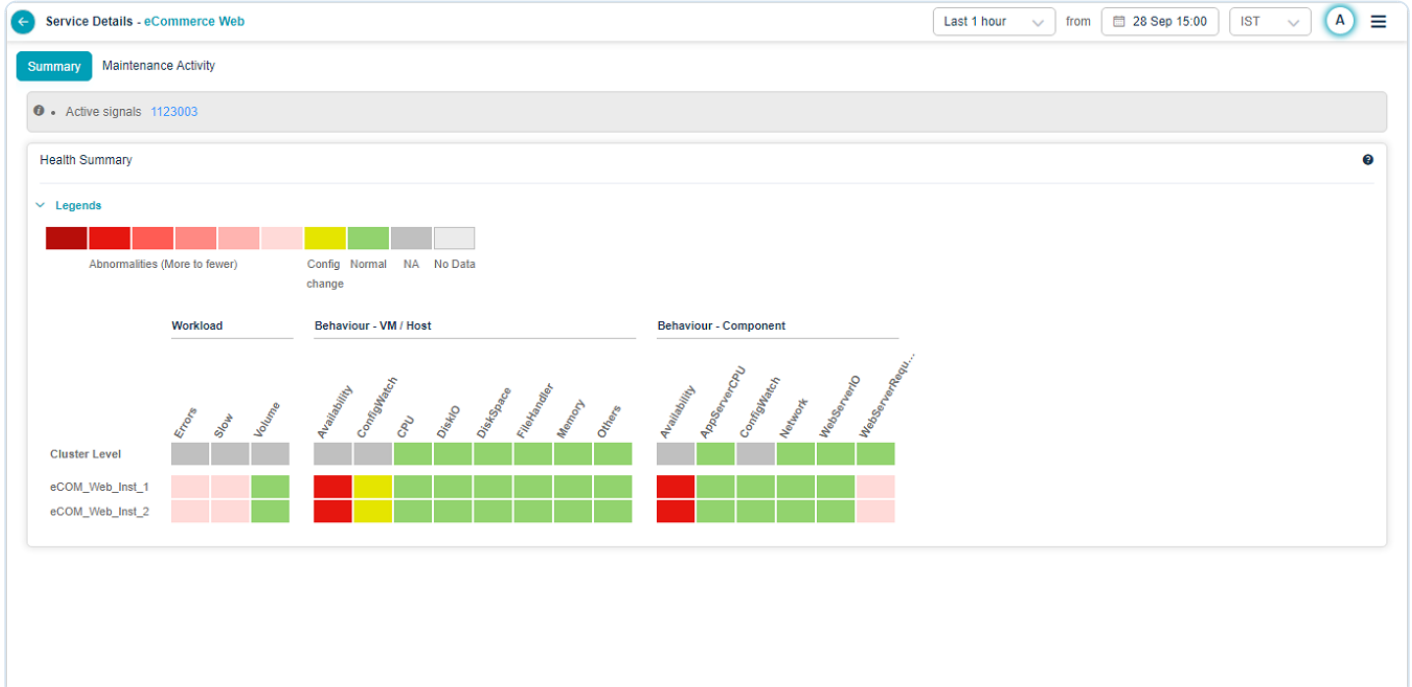

Table of Contents

Pick a quick range	3
Set a custom date and time	3
Pick the date	4
Pick the time	5

The date and time picker is in the top-right corner of every HEAL UI screen. Whatever range you pick, the screen refreshes to match.

Pick a quick range

Click the timestamp in the top-right corner. A preset dropdown opens.

1. **Current timestamp.** Click to open the date and time picker.
2. **Duration dropdown.** Pick a quick range for the screen.
3. **Available presets.** Last 30 minutes, 1 hour, 4 hours, 12 hours, 24 hours, 1 week, or 1 month.

Set a custom date and time

Click the timestamp box to open the calendar and time picker.

The screenshot shows the 'Service Details - eCommerce Web' page. At the top right, there is a timestamp '28 Sep 15:30' with a dropdown arrow. A date and time picker overlay is open, showing '28 Sep' and '15:30'. The picker has an 'Auto Refresh' toggle (1), a date input (2), a time input (3), an 'Apply' button (4), a 'Cancel' button (5), and a reset icon (6). Below the picker is a 'Health Summary' section with a legend and a table of metrics.

- 1. Auto Refresh.** Turn it on to refresh the screen on a set interval. The interval is configurable. With it off, you have to change the time manually to see new data.
- 2. Date.** Click to open the calendar.
- 3. Time.** Click to change the time.
- 4. OK.** Apply the selected date and time.
- 5. Cancel.** Discard your changes.
- 6. Reset icon.** Snap back to the current date and time.
